S&P 20, YEAR TO DATE RETURN

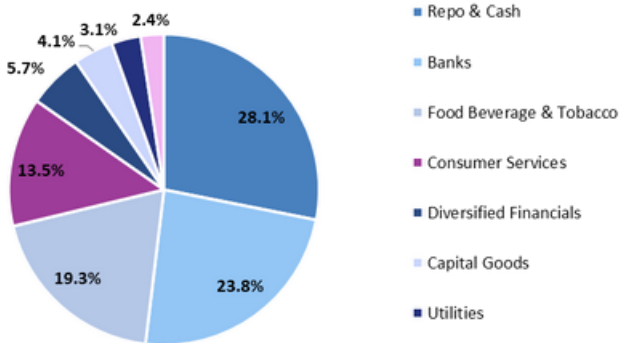

as at 29 November 2024

In November 2024 the return on Colombo Stock Exchange with ASPI increased by 3.3% while S&P 20 increased by 1.1% for the month. The CAL Quantitative Equity Fund increased by 4.8% in the month of November. During the last week of the month, the ASPI and S&P 20 indices have a Year-to-Date earning of 22.5% and 26.2%, respectively.

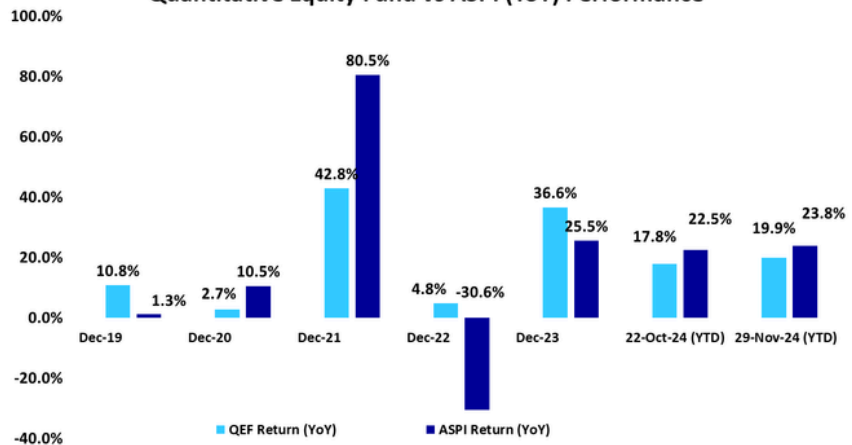

In 2022, the fund took a de-risking approach, which was eased off toward the later part of the year. In the beginning of 2023 fund exposure to equities was 42.25%. We believe that since then, the macro uncertainties that stemmed from sovereign bond payments and tightening liquidity in the market, have dissipated. We have since increased exposure to equities to 71.89%.

The team is closely monitoring all new developments and positioned well to enter the equity market at attractive valuations.
