In January 2025 the return on Colombo Stock Exchange with ASPI increased by 7.4% while S&P 20 increased by 5.2% for the month. The CAL Quantitative Equity Fund increased by 6.3% in the month of January. During the last week of the month, the ASPI and 5.2% indices have a Year-to-Date earning of 6.1% and 5.3%, respectively.

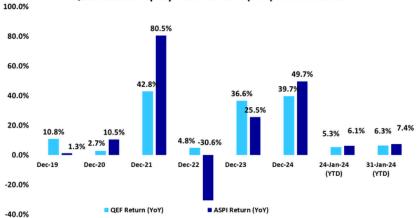

In 2022, the fund took a de-risking approach, which was eased off toward the later part of the year. In the beginning of 2023 fund exposure to equities was 42.25%. We believe that since then, the macro uncertainties that stemmed from sovereign bond payments and tightening liquidity in the market, have dissipated. We have since increased exposure to equities to 93.46%.

The team is closely monitoring all new developments and positioned well to enter the equity market at attractive valuations.
