

**CAPITAL ALLIANCE CORPORATE TREASURY FUND
COLOMBO 02**

**FINANCIAL STATEMENTS FOR THE
YEAR ENDED 31ST MARCH 2025**

As part of an audit in accordance with SLAuSs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- conclude on the appropriateness of management's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that material uncertainty exists, we are required to draw attention in our Auditor's Report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our Auditor's Report. However, future events or conditions may cause the fund to cease to continue as a going concern.
- evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Trustee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

These Financial Statements also comply with the requirements of Rule 50 of the Collective Investment Scheme Code (CIS Code) issued by the Securities and Exchange Commission of Sri Lanka in terms of Section 183 of the Securities and Exchange Commission Act No. 19 of 2021 and the Trust Deed.

1. CORPORATE INFORMATION

1.1 General information

Capital Alliance Corporate Treasury Fund ("the Fund") is an open-ended fund approved by the Securities and Exchange Commission of Sri Lanka. Capital Alliance Corporate Treasury Fund (formerly known as Capital Alliance Gilt Fund) was licensed to operate on 27th February 2012. The Fund was launched on 25th September 2012. The Fund's name was changed to Capital Alliance Corporate Treasury Fund with effect from 22nd February 2013 and was relaunched on 22nd March 2013.

The Fund is managed by Capital Alliance Investments Limited which has been incorporated and domiciled in Sri Lanka. The registered office of the Management Company is located at Level 05, "Millennium House", 46/58, Nawam Mawatha, Colombo 02. The Trustee of the Fund is Hatton National Bank PLC whose place of business is at "HNB Towers", No. 479, T. B. Jayah Mawatha (Darley Road), Colombo 10.

1.2 Operating activities

The investment objective of the Fund is to provide a high level of current income as is consistent with liquidity and stability of the principal.

1.3 Date of authorisation for issue

The Financial Statements of the Fund for the year ended 31st March 2025 were authorised for issue by the Management Company and the Trustee on 24th July 2025.

2. PREPARATION OF FINANCIAL STATEMENTS

2.1 Basis of preparation

The Financial Statements have been prepared on the historical cost basis unless otherwise indicated. The Financial Statements have been presented in Sri Lankan rupees, and the statement of financial position, on a liquidity basis.

2.2 Statement of compliance

The Financial Statements which comprise the statement of financial position as at 31st March 2025, statement of profit or loss and other comprehensive income, statement of movement in unitholders' funds and statement of cash flows for the year then ended, and a summary of material accounting policy information and other explanatory information have been prepared and presented in accordance with Sri Lanka Accounting Standards and the requirements of the Unit Trust Deed and Collective Investment Scheme Code (CIS Code 2022) of the Securities and Exchange Commission of Sri Lanka.

2.3 Basis of measurement

The Financial Statements have been prepared under the historical cost convention with the exception of certain assets and liabilities at fair value.

2.4 Functional and presentation currency

The Financial Statements have been presented in Sri Lankan Rupees, the Fund's functional and presentation currency, which is the primary economic environment in which the Fund operates.

2.5 Materiality aggregation

Each material class of similar items is presented separately in the Financial Statements. Items of a dissimilar nature or function are presented separately unless they are immaterial.

2.6 Going Concern

These Financial Statements are prepared on the assumption that the Fund is a going concern i.e. as continuing in operation for the foreseeable future. It is, therefore, assumed that the Fund has neither the intention nor the necessity of liquidation or of curtailing materially the scale of its operations.

2.7 Summary of material accounting policy information

2.7.1 Financial instruments

2.7.1.1 Initial recognition

Financial assets and liabilities are initially recognised on the trade date, i.e. the date that the Fund becomes a party to the contractual provisions of the instrument. This includes purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the marketplace.

2.7.1.2 Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. At initial recognition, the Fund measures a financial asset at its fair value plus transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in the statement of profit or loss.

2.7.1.3 Measurement categories of financial assets and liabilities

The Fund classifies all of its financial assets in the following measurement categories:

- those to be measured at amortised cost
- those to be measured at fair value through profit or loss

Financial liabilities of the Fund are measured at amortised cost, and include all financial liabilities, other than those measured at fair value through profit or loss. The financial liabilities of the Fund include accrued expenses and other payables.

2.7.1.4 Subsequent measurement

Amortised cost:

A debt instrument is measured at amortised cost if it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and its contractual terms give rise to cash flows that are solely the payments of principal and interest on the principal amount outstanding.

Debt instruments at amortised cost in the statement of financial position comprise investments in treasury bill repurchase agreements. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in realised gain/(loss) on debt instruments held at amortised cost.

Fair value through profit or loss:

A financial asset is measured at fair value through profit or loss if:

- (a) its contractual terms do not give rise to cash flows on specified dates that are solely the payments of principal and interest on the principal amount outstanding
or
- (b) it is not held within a business model whose objective is either to collect contractual cash flows, or to both collect contractual cash flows and sell
or
- (c) at initial recognition, it is irrevocably designated as measured at FVTPL and when doing so it eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

A gain or loss on a debt investment that is subsequently measured at FVTPL is recognised in profit or loss and presented net within unrealised gains/(losses) in the period in which it arises. As of 31st March 2025, the Fund has no such investments.

2.7.1.5 Recognition and initial measurement

The classification of financial instruments at initial recognition depends on their purpose and characteristics and the management's intention in acquiring them. Accordingly, the fund's financial assets have been classified as financial assets at amortised cost and financial assets at fair value through profit or loss.

At initial recognition, the Fund measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

2.7.1.6 Financial liabilities

a) Initial recognition and measurement

The Fund determines the classification of its financial liabilities at initial recognition.

The Fund's financial liabilities comprise accrued expenses and other payables in the Statement of Financial Position.

b) Subsequent measurement

The measurement of financial liabilities depends on their classification as described below:

Other financial liabilities

After initial recognition, other financial liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the Statement of Profit or Loss and Other Comprehensive Income when the liabilities are derecognised as well as through the Effective Interest Rate(EIR) amortisation process.

2.7.1.7 Impairment

The Fund assesses on a forward-looking basis, the expected credit losses (ECLs) associated with its debt instruments not held at fair value through profit or loss. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Fund expects to receive, discounted at an approximation of the original effective interest rate.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures from which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

The Fund uses the ratings from Fitch Rating Lanka Limited and Lanka Rating Agency Limited as applicable to determine the significant deterioration in credit risk and to estimate the ECLs.

Consistent with the policies of the Fund, investments when rated below BBB- are considered as non-investment grade investments and the Fund considers such investments as having incurred significantly deteriorated credit risk. Such investments are considered for life time ECL calculation.

Further, movements within the ratings of the investment grade stipulate significant deterioration of credit risk. Significant deterioration is measured through a two notch downgrade of the external credit rating of the counterparty since the origination of the instrument.

For debt instruments at amortised cost issued by the Sovereign, the Fund applies the low risk simplification.

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the financial assets.

Write-offs

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery.

2.7.1.8 Derecognition

A financial asset is derecognised when,

- 1) the rights to receive cash flows from the asset have expired,
- 2) the Fund has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without a material delay to a third party under a 'pass-through' arrangement; and either,
 - the Fund has transferred substantially all the risks and rewards of the asset or
 - the Fund has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

2.7.1.9 Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if:

- there is currently an enforceable legal right to offset the recognised amounts, and
- there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

2.7.2 Cash and cash equivalents

Cash and cash equivalents in the statement of financial position and statement of cash flows comprise cash at bank.

2.7.3 Income tax

Current tax assets and liabilities for the current and prior year are measured at the amount expected to be recovered from, or paid to the taxation authorities. Until 31st March 2018, the Fund was liable to pay income tax at the rate of 10% in accordance with the Inland Revenue Act No. 10 of 2006. Subsequent to the enactment of the new Inland Revenue Act No. 24 of 2017, effective from 01st April 2018, an Eligible Unit Trust is not liable for income tax on any income which is a "pass through" to its unit holders. Accordingly, after 31st March 2018, the Fund has considered all income as being a "pass through" its unitholders.

2.7.4 Recognition of income

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the revenue can be reliably measured. The following specific criteria must also be met before revenue is recognised.

Interest Income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset.

2.7.5 Expenses

The Management, Custodian and Trustee fees of the Fund as per the Trust Deed are as follows.

Management fee	- 0.5% of net asset value of the Fund
Trustee fee	- 0.13% p.a. of net asset value of the Fund
Custodian fee	- Flat fee of Rs. 20,000/- per month

During the 2024/25 financial year, the custodian waived its fees for this Fund.

2.7.6 Unitholders' Funds and net assets attributable to unitholders

Unitholders' funds have been calculated as the difference between the carrying amounts of the assets and the carrying amounts of the liabilities, other than those due to unitholders as at the reporting date.

Units can be issued and redeemed based on the Fund's net asset value per unit, calculated by dividing the net assets of the Fund as described in the Trust Deed and directives issued by the Securities and Exchange Commission of Sri Lanka, by the number of units in issue. Income not distributed is included in net assets attributable to unitholders.

3. FINANCIAL RISK MANAGEMENT

3.1 Financial instruments

The Fund's principal financial assets comprise investment repurchase agreements, fixed deposits and cash at bank. The overall objective of this Fund is to optimise income at very low levels of risk, essentially retaining the risk-free nature of Government securities but offering the convenience of a unit trust. The Fund's principal financial liabilities comprise amounts attributable to Unitholders, which are the amounts owed to Unitholders of the Fund. The Fund also has other financial instruments such as receivables and payables which arise directly from its operations.

In accordance with SLFRS 9 *Financial Instruments*, the investments in repurchase agreements are classified as 'financial assets at amortised cost' and are valued at amortised cost. Amounts attributable to Unitholders are classified as 'equity' and are carried at the redemption amount being net asset value. Accrued expenses are classified as 'other financial liabilities' at amortised cost.

3.2 Financial risk management objectives, policies and processes

Risks arising from holding financial instruments are inherent in the Fund's activities, and are managed through a process of ongoing identification, measurement and monitoring. The Fund is exposed to credit risk, market risk, liquidity risk and economic risk.

Financial instruments of the Fund comprise investments in treasury bills/bond repurchase agreements, for the purpose of generating a return on the investment made by Unitholders, in addition to cash at bank, and other financial instruments such as receivables and payables, which arise directly from its operations.

The Management Company is responsible for identifying and controlling the risks that arise from these financial instruments. The Management Company agrees to policies for managing each of the risks identified below.

MATERIAL ACCOUNTING POLICY INFORMATION TO THE FINANCIAL STATEMENTS

The risks are measured using a method that reflects the expected impact on the statement of profit or loss and other comprehensive Income and Statement of Financial Position of the Fund from reasonably possible changes in the relevant risk variables. Information about these risk exposures at the reporting date, measured on this basis is disclosed below.

The Management Company also monitors information about the total fair value of financial instruments exposed to various risks, as well as compliance with established investment mandate limits. These mandate limits reflect the investment strategy and market environment of the Fund, as well as the level of risk that the Fund is willing to accept, with additional emphasis on selected industries. This information is prepared and reported to relevant parties within the Management Company on a regular basis as deemed appropriate, including the Fund Management Company, other key management, Risk and Investment Committees and ultimately the Trustees of the Fund.

Concentration of risk arises when a number of financial instruments or contracts are entered into with the same counterparty, or where a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economics, political or other conditions.

3.3 Credit risk

Credit risk is the risk that the counterparty to the Financial Statements will fail to discharge an obligation and cause the Fund to incur a financial loss.

The Fund's exposure to credit risk from its financial assets arises from default of the counterparty. It is the Fund's policy to enter into financial instruments with reputable counterparties.

Capital Alliance Corporate Treasury Fund's investments are only in repurchase agreements against Government securities.

3.3.1 Debt securities

The Fund invests in debt securities which are risk low risk investments. An analysis of debt securities by rating is set out in the table below.

Risk rating	31 st March 2025 Rs.	31 st March 2024 Rs.
Low risk	7,946,304	10,345,101
Total	7,946,304	10,345,101

The investments grading of the issuer is as follows:

Issuer	Rating	Rating Agency
Capital Alliance PLC	A	Lanka Rating Agency Limited

3.3.2 Cash and cash equivalents

All counterparties have a rating of AA- as determined by the Fitch rating agency. However, in accordance with the Fund's policy, the investment manager monitors the Fund's credit position on a daily basis, to maintain credit risk at a minimum level.

3.3.3 Credit risk by class of financial assets

As at 31 st March 2025	12-Month expected credit losses Rs.	Lifetime expected credit losses not credit impaired Rs.	Lifetime expected credit losses credit impaired Rs.	Total Rs.
Financial assets				
Financial assets at amortised cost	7,946,304	-	-	7,946,304
Other receivables	523	-	-	523
Cash and cash equivalents	3,105,399	-	-	3,105,399
	11,052,226	-	-	11,052,226

As at 31 st March 2024	12-Month expected credit losses Rs.	Lifetime expected credit losses not credit impaired Rs.	Lifetime expected credit losses credit impaired Rs.	Total Rs.
Financial assets				
Financial assets at amortised cost	10,345,101	-	-	10,345,101
Other receivables	247	-	-	247
Cash and cash equivalents	1,140,175	-	-	1,140,175
	11,485,523	-	-	11,485,523

There are no difference in the net exposure to the credit risk and the maximum exposure to the credit risk for the above financial assets.

3.4 Market risk

Market risk represents the risk that the value of portfolios will fluctuate as a result of changes in market prices. This risk is managed by ensuring that all investment activities are undertaken in accordance with established mandate limits and investment strategies. As such, unitholders can manage this risk through their choices of which investment portfolios to participate in.

MATERIAL ACCOUNTING POLICY INFORMATION TO THE FINANCIAL STATEMENTS

The Fund uses a range of different fund arrangements for investment assets. Where a unitholder has invested in more than one investment portfolio, this reduces the impact of a particular manager underperforming within the underlying investment portfolio and diversification is achieved at a number of levels. The diversified portfolios are invested across a range of investment sectors. Within each sector of the diversified portfolios, the Fund managers invest in a variety of securities.

3.4.1 Cash flow and fair value interest rate risk

The Fund is exposed to cash flow interest rate risk on financial instruments with variable interest rates. Financial instruments with fixed rates expose the Fund to fair value interest rate risk. The Fund's interest bearing financial assets are exposed to risks associated with the effect of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The risk is measured using the sensitivity analysis.

The Fund's policy is to hold all its net assets attributable to unitholders invested in debt securities. The table below summarises the Fund's exposure to interest rate risks. It includes the Fund's assets and liabilities at fair values, categorised by the earlier contractual re-pricing on maturity dates.

As at 31 st March 2025	Floating interest Rs.	Fixed interest Rs.	Non-interest Rs.	Total Rs.
Financial assets				
Cash and cash equivalents	Nil	Nil	3,105,399	3,105,399
Financial assets at amortised cost	Nil	7,946,304	Nil	7,946,304
Other receivables	Nil	Nil	523	523
Total exposure	Nil	7,946,304	3,105,922	11,052,226

As at 31 st March 2024	Floating interest Rs.	Fixed interest Rs.	Non-interest Rs.	Total Rs.
Financial assets				
Cash and cash equivalents	Nil	Nil	1,140,175	1,140,175
Financial assets at amortised cost	Nil	10,345,101	Nil	10,345,101
Other receivables	Nil	Nil	247	247
Total exposure	Nil	10,345,101	1,140,422	11,485,523

3.5 Interest rate risk

Interest rate risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market interest rates.

The Fund's interest-bearing financial assets are exposed to risks associated with the effects of fluctuations in the prevailing levels of market interest rates. The risk is measured using sensitivity analysis. However, due to the short-term nature of the instruments at the fixed interest rate, it is reasonably expected that the fluctuation in interest rate will not materially impact the net assets value of the Fund.

3.5.1 Summarised sensitivity analysis

The following table summarises the sensitivity of the Fund's operating profit and net assets attributable to unitholders' interest rate risk and other price risks. The reasonably possible movements in the risk variables have been determined based on management's best estimate, having regard to a number of factors, including historical level of changes in interest rates, historical correlation of the Fund's investment with the relevant benchmark and market volatility. However, actual movements in the risk variables may be greater or less than anticipated due to a number of factors, including unusually large market shocks resulting from changes in performances and correlation between the performances of the economies, markets and securities in which the Fund invests. As a result, historic variations in risk variables should not be used to predict future variations in the risk variables.

	Impact on operating profit/net assets attributable to unitholders' interest rate risk 31 st March 2025	Impact on operating profit/net assets attributable to unitholders' interest rate risk 31 st March 2024
Change in interest rate of the Fund's investment in trading securities:		
+1%	79,463	103,451
-1%	(79,463)	(103,451)

3.6 Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in raising funds to meet its obligation to pay unitholders.

Due to the nature of a unit trust, it is unlikely that a significant number of unitholders would exit at the same time. However, to control liquidity risk, the Fund invests in financial instruments which are readily convertible into cash under normal market conditions. In addition, the Fund invests within established limits to ensure that there is no concentration of risk. The Management Company ensures that a minimum liquidity level of 3% of the total NAV of the Fund is available in cash or near cash form at any given time as required by the Unit Trust Code, reducing the liquidity risk to its investors.

In addition, the Security and Exchange Commission and the Fund require additional number of business days' notice to the Fund from large investors redeeming over 3% of the Fund and the Fund is also permitted to borrow up to 15% of the deposited property for redemption payouts. No such borrowings have arisen during the period.

The table below analyses the Fund's non-derivative financial assets and liabilities into relevant maturity groupings based on the remaining period at the end of the reporting period. The amounts in the table are the contractual undiscounted cash flows.

As at 31 st March 2025	Less than 1 month Rs.	1-6 months Rs.	6-12 months Rs.	1-2 years Rs.	Total Rs.
Financial assets					
Financial assets at amortised cost	7,951,501	-	-	-	7,951,501

3.7 Economic risk

The decelerated trend was witnessed in year on year Inflation measured by the CCPI (2021=100) which recorded at 0.70 % in March 2025 from 3.40% in April 2024.

Interest rates displayed a declining trend during the period. The benchmark 12-month Treasury bill rate which was at 10.28% p.a. in April 2024 recorded a drop to 8.25% p.a. by the end of March 2025. Yields on long term Treasury bonds also followed a decreasing trend. Central Bank key policy rates were gradually reduced two times during the financial year 2024/25. As of end March 2025, the SDFR, SLFR and SRR were at 7.50%, 8.50% and 2% respectively.

MATERIAL ACCOUNTING POLICY INFORMATION TO THE FINANCIAL STATEMENTS

The exchange rate which was at 300.4081 (Rs./US\$) at the beginning of April 2024, depreciated by 1.35% against USD during the year and was recorded at 296.3472 (Rs./USD) as at 31st March 2025.

The United States has introduced new reciprocal tariffs under President Donald Trump, significantly impacting global trade. Sri Lanka is among the top 10 countries affected, with tariffs reaching up to 44%. Due to tariff announcement, the equity market took a nosedive, dropping 4.5% - its biggest one-day drop in 2 years, which was at the peak of the economic crisis. Government securities also lost ground, as yields rose between 20-50 bps across the curve (from the tariff announcement to the pause) which saw the Treasury utilise its cash buffers at auctions to limit volatility in interest rates while reducing borrowing needs from the market as recommended by the IMF. Then, when the 90-day pause was announced, equity markets did a 180, bouncing back 4.7% in a single day, with bond yields falling 20-40 bps to date since the pause.

The Fund's management continuously monitors these macroeconomic factors and employs diversification and portfolio adjustments to mitigate potential adverse impacts.

3.8 Capital risk management

The Fund considers its net assets attributable to unitholders as capital, notwithstanding that net assets attributable to unitholders are classified as a liability. The amount of net assets attributable to unitholders can change significantly on a daily basis as the Fund is subject to daily applications and redemptions at the discretion of unitholders.

Daily applications and redemptions are reviewed relative to the liquidity of the Fund's underlying assets on a daily basis by the Management Company. In terms of the Unit Trust Code, the Management Company has the discretion to reject an application for units and to defer redemption of units if the exercise of such discretion is in the best interests of unitholders.

The disclosures of Unitholders' Funds are as follows.

The movement in the Unitholder's Funds as at 31st March 2025

I. In terms of Value

	Rs.
Unitholders' funds as at 01 st April 2024	11,454,435
Creations during the year	16,512,020
Redemptions during the year	(17,632,979)
Total comprehensive income for the year	703,359
Unitholders' funds as at 31 st March 2025	11,036,835
