Economic Review – September 2024

Sri Lanka has maintained its accommodative monetary policy stance in FY24 as inflation eased and economic activity rebounded. For the six months ending September 2024, the short term-treasury bills and longer-term bond rates have remained relatively stable, illustrated below.

Furthermore, during the same period, the Central Bank of Sri Lanka (CBSL) has reduced its Standing Deposit Facility Rate (SDFR) and the Standing Lending Facility Rate (SLFR) by 25 basis points, to 8.25% and 9.25% respectively. The Statutory Reserve Ratio (SRR) however, remained unchanged. These monetary policy adjustments aided in stabilizing the economic environment characterized by declining inflation, recovering consumer spending, and increased private sector investments.

Private Sector Credit Growth has experienced a positive trajectory, growing by 8.8% to LKR 7,794Bn year-on-year, contributing to an overall rise in GDP in 2024. The GDP growth YoY for the second quarter of 2024 stood at 4.7%. This rise suggests that both consumer demand and business investments have been on the upswing and serves as a key indicator of the ongoing economic recovery.

As of September 2024, Sri Lanka's inflation has significantly decreased. The Colombo Consumer Price Index (CCPI) recorded a deflation of -0.5% year-on-year in September 2024, down from a 0.5% increase the previous month, marking the first deflation since 1995. This was largely driven by the base effect as 2023 experienced extremely high levels of inflation. The National Consumer Price Index (NCPI) also reflects this, falling to -0.2% year-on-year in September. We expect inflation to loom around positive low single digit levels in the coming few months.

The Gross official reserves as of 30th September 2024 have risen close to USD 6Bn, up from USD 4.5Bn at the start of 2024, following the continued fund facility with the International Monetary Fund and other inflows of dollars.

The Sri Lankan Rupee (LKR) has further appreciated against the USD, where end September 2024 records the LKR at 299.36 to USD 1. This represents an approximate 7.60% appreciation of the LKR against the US Dollar since the start of 2024.

Sri Lanka's Balance of Payments surplus has steadily improved, driven by strong foreign remittances, which reached a notable USD 4.8Bn from January to September compared to USD 4.3Bn in 2023 for the same period. Additionally, the number of tourist arrivals saw a robust 46% year-on-year growth during the same period, contributing to a significant increase in tourism earnings, totaling to USD 2.3Bn as of 30th September 2024, compared to USD 1.4 Bn in 2023.

The current outlook suggests a continued accommodative monetary policy stance, with low inflation expected to persist through 1Q25, primarily due to the base effect. We anticipate a continued decline in interest rates in the economy, given no sudden changes to economic metrics.

By considering both macro and microeconomic factors, we have strategically adjusted our fund allocations to achieve an optimal balance of risk and return, ensuring above-market returns for our unit trust funds.
