Economic Review – September 2025

Sri Lanka has continued its accommodative monetary policy stance into the current fiscal year (FY) 2025/26. This continuation is in line with the gradual acceleration of inflation toward the target rate of 5%. Despite minor mixed movements observed in the yield curve, it has retained its upward-sloping shape, indicating a normal market condition.

The Central Bank of Sri Lanka (CBSL) has transitioned from a dual policy rate system to a single policy interest rate framework, designating the Overnight Policy Rate (OPR) as its primary monetary policy instrument. Following this shift, the CBSL reduced the OPR by 25 basis points to 7.75% in May, while maintaining the Statutory Reserve Ratio (SRR) unchanged for FY 2025/26. This policy decision aims to support the ongoing economic recovery, guide inflation toward the target, and enhance market clarity regarding the central bank's monetary stance.

Private sector credit growth continued to show positive momentum, reflecting strengthened business confidence and more favorable lending conditions. Sri Lanka's GDP for the second quarter of 2025 is estimated to have grown by 4.9% at constant 2015 prices, driven by notable expansions across key sectors. The industrial sector recorded a growth rate of 5.8%, the services sector grew by 3.9%, and the agricultural sector expanded by 2.0%.

The Colombo Consumer Price Index (CCPI), which had been in deflation for 11 consecutive months, returned to positive territory, recording inflation of 1.2% in August and 1.5% in September 2025. This upward momentum is expected to persist, gradually converging toward the Central Bank's target level of 5%. The Sri Lankan Rupee depreciated by approximately 2% following the first quarter of 2025, moving from LKR 296.3472 per USD at the end of March to LKR 302.6097 per USD by the end of September.

Sri Lanka's external position improved notably, driven by a significant current account surplus of USD 931 million recorded during the first two quarters of FY 2025/26. This performance represents a 31% increase compared to the corresponding period of the previous fiscal year. Foreign Currency Reserves stood at USD ~6.2Bn by the end of September 2025 which demonstrating MoM growth of 1% and YoY growth of 4%.

During FY2425, Sri Lanka demonstrated a strong fiscal management, exceeding key targets set under the IMF programme. Notably, CBSL maintained net credit to the government within agreed limits while continuing to build up foreign exchange and liquidity buffers. These buffers have strengthened CBSL's position at primary auctions, enabling it to manage interest rates effectively without disrupting market stability. This balance between meeting fiscal targets and defending interest rates highlights the improved credibility and policy discipline of the monetary authority.

Given the current trajectory of inflation and policy rates, we expect a sustained low-interest rate environment over the near to medium term, barring any major external shocks. This favorable macroeconomic backdrop, alongside targeted microeconomic strategies, has enabled us to rebalance our unit trust fund allocations towards higher-yielding instruments while prudently managing risk—positioning the portfolios for above-market returns.
